Subject: VSCCA SCHOOL

With Pocono having been cancelled for 2012, we will hold the VSCCA school at the Spring Sprints at Lime Rock. As always, we will need all of your support to get the word out to any potential new member/student that you feel may be appropriate for the club, and make sure that they plant these two days firmly upon their calendars for next year. As a reminder, a log book car is not necessary for the school. Any safe, appropriate, sporting vehicle will be considered. So if you know someone who might be a great candidate, and their car is not ready, or they simply want to see if it is for them, please get them into the club and signed up.

The school is much more than just first track experience. It includes orientation, classroom instruction, and more.

More details will follow, but tentatively students should plan to be at the track for classroom sessions the first thing Friday morning. And then hopefully there will be van rides at lunch before the VSCCA regular groups start.

So while students certainly will get on track, much of their time will be spent in other ways which does not require track time. This means not only that they will feel comfortable before they ever go out, but also that you can feel confident that your time will not be diminished at this event.

Once again, more details will follow, but any further questions, please don't hesitate to ask Charles Bordin, Phil Roettjer or myself.
